DORUKSISTEM "ONLY REPRESENTATIVE" SERVİCES

DO YOU EXPORT TO TURKEY?

How to support your Turkish customer?

WHAT ARE KKDIK AND SEA?

TURKISH REACH LAW **KKDIK** and CLP By-Law **SEA** are the Turkish laws to ensure the safe use of chemicals. They apply to products manufactured in or imported into **TURKEY**.

The SEA Regulation implements the United Nations' Globally Harmonised System (GHS) for classifying and labelling chemicals in Turkey.

DO YOU HAVE RESPONSIBILITIES AS AN EXPORTER TO TURKEY?

Strictly speaking, no.

But your Turkish customer does, and you will need to help them if your export is to continue. For example, they may need detailed information on the composition and properties of the article you are exporting to Turkey.

*It is possible to appoint a company to do this work for you – a so-called '**only representative**'. They can fulfil the duties of the Turkish importer. An only representative must be a company or a person established in Turkey.*

*Visit **www.doruksistem.com.tr** for more information about our "Only Representative" services*
